## TWELVE PAGES.

BE a booster all the time of the locality in which you live.

COME, now, winter, play fair and no return engagements. Little Willie wants to get busy in his garden.

THIS everlasting grind! But, then, not many of us are making strenuous efforts to get away from it for that long season of rest we read about.

STATE supreme court holds that Judge Metcalf of Geauga county is to remain on the circuit court bench which leaves Judge Hoyt of Ashtabula, Gov. Harmon's appointee, out in the cold.

PATTEN and his wheat corner are down and out and as the price of wheat falls flour comes tumbling after. There is no immediate danger of the price of bread being advanced as was for a time threatened.

LOCALLY candidates for offices to be filled at the election next November are not tumbling over one another in efforts to enter the lists. But there is likely to be something doing in that line in the course of a few weeks.

THOSE men in congress styling themselves democrats who are working with Aldrich and Cannon in highly protecting sugar, rice, tobacco, cotton, oil, etc., will likely come in for a rough awakening when their constituents have an opportunity to get a whack at them.

BOB McKISSON, mayor of Cleveland from 1895 to 1899, Wednesday night announced himself a candidate for the republican nomination for that office. A fight between McKisson and Mayor Tom Johnson will come as one as to arrest attention in all quarters of the state.

STARK and Columbiana county republicans grooming candidates for congress? Well, they may just as well husband their energy on that score for has not Mahoning, in Mr. Kennedy, a candidate for a fourth term that will trim them all when it comes time to make selection of a favorite son? Sartin, sure.

In nearly every county in the state steps are being taken to improve the highways, long neglected or indifferently worked. Mahoning county is not bringing up the rear in this march of progress, many of the townships having already voted by large majorities to issue bonds in varying sums to build roads, and in several of them the work of construction will begin within a few weeks.

A MOVEMENT has been started in Boston to hold an international exposition in that city in 1920 to commemorate the three hundredth anniversary of the landing of the Pilgrims and the founding of New England. 1920 is so far away and so much is doing every minute of these days that Boston and her prospective show can at this stage of the game be given hardly more than a passing thought.

ROSS county voted "wet" Wednesday by a majority considerably above 8,000. The election was the most exciting and bitter ever held in the county. There were wholesale arrests and Co. H. O. N. G., was called out to preserve order in Chillicothe. The chief of police was called to a call to consult with a minister who had been arrested for venturing within the 100-foot limit of a polling booth. There was no disturbance in the rural precincts. Women worked all day in every voting precinct. Each side had several of the other side arrested on charges of buying votes, giving away liquor and assault.

The Perry Township Civic league has arranged for a joint public meeting with the Salem Federation of Churches at the First M. E. Church in this city, Sunday evening, May 2. The meeting will have to do largely with the question of proper law enforcement in this city, in which the league and the church federation desire to interest all citizens.

## Power in Silence.

Here is a hint for the women who forget and fret and fuss. Go into the silence at certain times of the day. One need not necessarily retire for formal prayer. "He who is in the path of duty needs no prayer," said a wise oriental. But in the silence you will find the peace and strength of prayer. In withdrawing from the pressure of things and getting in touch with the great sources of power, you will absorb power.—Edwin Markham, in Red Book.

## Scale of Homicidal Values.

One railroad president equals two ordinary magnates; one ordinary magnate equals three captains of industry; one captain of industry equals six theater managers; one theater manager equals 500 theatergoers; one theatergoer equals 400 railway passengers; one railway passenger equals 600 employees; one employee equals 2,000 miners; one miner equals 5,000 sweatshop workers.

## RAISING WATER FROM STREAM

Novel Plan for Getting Water from a Stream to High Bluff Above with Little Work.

The solution of a serious problem of raising water to a bluff 120 feet above a running stream is given by Mr. J. R. Patterson of Washington. There are no springs on his farm, except at the water's edge. "All the water had to be carried," he says.

Device for Raising Water.

"I dug a well, to tap one of these springs near the river, and rigged up the device for drawing water as shown in the cut. I set up two sets of stakes as shown at a."

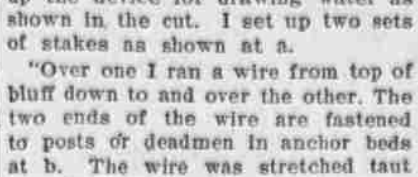

"Over one I ran a wire from top of bluff down to and over the other. The two ends of the wire are fastened to posts or deadmen in anchor beds at b. The wire was stretched taut by allowing the stakes to lay away from permanent point of erection until anchors were secured, when they were raised up and against the wire d."

"I then rigged a windlass, e, at the top of the hill, over which was run a rope, f, holding the bucket which was fastened to trolley, d, by a substantial pulley. The rope passed through a second pulley suspended from trolley at c. A block is secured to the trolley, d, so that when the pulley in descending strikes the block the bucket will pull the rope through the under pulley and so lowers into the well. In raising the bucket will come to top and strike pulley before the tackle starts to top."

## KEEP GATE FROM SAGGING.

Remedy to Prevent Gate from Getting Out of Proper Position.

Most farm gates are heavy, and after a little time they sag. When they get this way it takes a strong man to open and shut one. Here is a remedy. Get a wheel, either big or

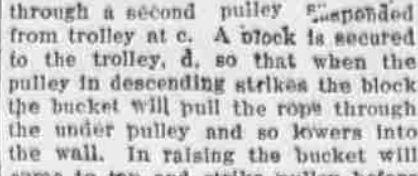

Use for an Old Plow Wheel.

little, from an old piece of machinery, and bolt it to the front end of the gate in such a way that the gate will be held level. Now the smallest child can open the gate for you. Try it, for it is a savior—saves your patience, your back, and the gate.

## BRACING STRAINED POSTS.

A Plan is Given Below for Strengthening Corner Posts When Weakened.

Where a heavy strain comes upon a corner post, an arrangement such as shown in the cut will be found useful. Place two posts solidly in the ground, slanting toward each other, and fasten

A Post Braced.

the tops together securely by a bolt or by winding them with wire. To these attach a wire, the other end of which may be buried in the ground. If the stone is firmly secured, these posts will resist all pressure from the wires.

## How to Build Good Roads.

In all this talk about getting better roads it seems to me that there are two very simple precautions that no one has mentioned. In the first place, in building a road, says a writer in the Country Gentleman, get, as far as possible, local contractors. The present system of state road building brings a contractor from somewhere else who may often do a bad job and vanish. No one follows him, and the people may rage all they please in vain. A local man will take more pride in his job and be more subject to correction if he doesn't. In the second place, instead of appropriating a fixed sum for building a road, let the amount be left to the discretion of the officer in charge, who shall estimate the cost of such a proposed road. Then let the contractors bid on the basis of the percentage of profit for which they are willing to undertake this work. Now, when a certain sum is appropriated, I notice that it is sure to be spent; the contractors' bids just dodge under the total, and the difference is eaten up by extra work. I believe the other system would give more economical results.

## Aunt Hetty Green should put up a first rate imitation of the traditional brand of mother-in-law.

## Man's By-Products.

There is enough hydrogen gas in a man, says the Medical Index Lancet, to carry him up to the clouds. He contains enough fat to make 75 candles and a large cake of soap, and enough phosphorus to make 8,064 boxes of matches. His remaining constituents will yield, if utilized, six cruet of salt, a bowl of sugar and ten gallons of water.

## Yield of Ginger Plantations.

Foley's Kidney Remedy imparts new life and vigor. Pleasant to take. F. A. Morris, Canfield.

## WHAT HE WANTED.

"But," said the manager of the musical comedy company, addressing the young man who had been called in to brighten up the place a bit, "it ought to be easy enough for you to throw in a joke here and there and add a little comedy to the songs. I can't see why you should want much for it."

"You see, it's going to be a good deal of a task. Jokes and comedy can't be tossed off without serious thought. One has to work up new situations. If it were possible to use mother-in-law jokes and those old gags about the Chicago girl's feet, it would be easy enough. Those things are, however, so—"

"There! You've struck a lead already, you see. That's just the kind of stuff I want. Go ahead. You can finish up the job in an evening."

"I thought you wanted real humor."

"Well, ain't that real humor? It's what makes all the musical comedies go, all right. Get busy, and if you do a good job I'll give you \$15."—S. E. Kiser, in Chicago Record-Herald.
